Outlook

Outlook

Cautiously optimistic outlook for 2026

- The ongoing conflict in the Middle East creates geopolitical uncertainties with macroeconomic implications.
- TITAN has no exposure to the affected regions. However, conflict-driven implications, including higher energy prices, may impact market trends and increase inflationary risks.
- We are constantly monitoring the evolution of the situation. Focused on cost/cash flow discipline, procurement and hedging actions to mitigate any potential impact.
- Cautiously optimistic outlook for 2026, expecting increased volumes, along with inorganic growth thanks to the recent announced acquisitions.
- Margin expansion to be supported by ongoing cost initiatives.
- Guidance:
 - **SALES growth LSD (LfL)**
 - **EBITDA growth MSD (LfL)**
 - **CAPEX at €350m-400m (to be reconfirmed mid-year)**

USA

- Construction market to remain broadly stable in 2026, amid elevated financing costs & persistent input inflation.
- Main growth drivers include federal & infrastructure spending, as well as manufacturing onshoring.
- Mixed residential market, expected to start growing in 2027, thanks to supply shortages & demographic demand.

Southeastern Europe

- Broadly positive-resilient outlook in the Southeast region.
- Construction sector should maintain momentum; growth to be driven by domestic consumption, increased public and private investment.
- Inflation should stabilize supporting purchasing power and business confidence.

Greece & Western Europe

- EU's RRF investments in construction and renewable energy should continue to drive sustained growth.
- Strong private consumption, rising real wages, declining unemployment & fiscal discipline support growth.
- Tourism industry is expected to continue thriving.

Eastern Mediterranean

- Egypt's economy to grow, driven by IMF-guided reforms with moderate inflation. Titan's investments in silo capacity, boost the competitiveness of exports.
- Türkiye's economy expected to grow as well; structural reforms still needed. Post-earthquake reconstruction remains a tailwind for the sector.
